### 3 HAZARDS IDENTIFICATION

- Route of Entry:** Eyes, skin, inhalation, ingestion
- Target Organs:**
- Inhalation:** Inhalation of vapors or spray mist may cause headaches, and/or nose and throat irritation.
- Skin Contact:** Repeated or prolonged contact with skin may produce redness, irritation and/or dryness. May cause or aggravate dermatitis or other existing skin condition.
- Eye Contact:** May cause immediate or delayed irritation. Irritation may show up as redness and/or swelling. May cause corneal damage.
- Ingestion:** Ingestion may cause irritation to the mouth, esophagus, and/or stomach.
- Signs or Overexposure:** Irritation of eyes, nose, throat, digestive tract.
- Pre-existing Conditions Aggravated:** Skin and respiratory disorders. Alcoholism, kidney, liver, cardiovascular and nervous system

**CAUTION! CONTENTS UNDER PRESSURE EXTREMELY FLAMMABLE**

### 4 FIRST AID MEASURES

- Inhalation:** Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Continue to monitor. Get medical attention.
- Skin Contact:** Remove contaminated clothing immediately! Wash skin with soap and water. If irritation develops, seek medical attention.
- Eye Contact:** Flush eye(s) with water for 15 minutes. Get medical attention. If eye irritation persists, obtain medical treatment.
- Ingestion:** Do not induce vomiting. Get medical attention immediately.

### 5 FIRE FIGHTING MEASURES

**Flash point:** <0°F\*

**Extinguishing Media:** Dry chemical, carbon dioxide or foam is recommended. Water spray may be used to cool containers or structures.

**General Fire and Explosion Hazards:** This material may be ignited by heat, sparks (static electricity), flame or other ignition sources. Vapors are heavier than air and will collect in low areas (sewers) and can travel considerable distances. If containers are not cooled in a fire, they may explode.

**Fire Fighting Procedures:** Emergency responders should wear self-contained breathing apparatus. Wear other protective gear as conditions warrant. Keep unauthorized people out. Try to contain spills or leaks if it can be done safely. Material will float on water. Avoid spreading.

**Unusual Fire & Explosion Hazard:** Level 3 Aerosols - Contents Under Pressure

**Special Fire Fighting Procedures:**

At elevated temperatures (over 130F) aerosol container may burst, vent or rupture; use equipment or shielding to protect personnel. Cooling exposed containers with streams of water may be helpful.

### 6 ACCIDENTAL RELEASE MEASURES

Eliminate all sources of ignition and ventilate the area. Aerosol cans should be handled with caution. Sudden release of pressure could produce projectiles and atomized liquid. Leaking aerosol cans should be put into suitable container until the internal pressure has dissipated. Take precautions to prevent contamination of ground and surface waters. Do not flush into sewers or storm drains. Use suitable absorbents to collect liquid product. Consult regulations for the proper disposal of the container, liquid and absorbents.

### 7 HANDLING AND STORAGE

**Handling Precautions:** Use in accordance with good industrial workplace practices. Avoid unnecessary contact. Wash thoroughly after handling. Use with good ventilation.

**Storage Requirements:** Store in a dry place away from excessive heat. Store containers with lids on and properly labeled.

Do not store at temperatures above 120 degrees F.

### 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

**Engineering Controls:** Eye wash stations and emergency showers should be immediately available.

**Protective Equipment:** Eyes and Face: Standard safety glasses with splash shields typically offer adequate protection. Where excessive splashing or spraying is possible, a face shield should be used.

Skin and clothing: Excessive contact should be avoided. Nitrile gloves, boots and aprons will provide adequate protection when contact cannot be avoided. Remove and wash any contaminated clothing immediately. Wash thoroughly after handling.

Respiratory: Good general ventilation should be sufficient to control airborne levels. Maintain airborne concentrations below OSHA established exposure limits of ingredients in Section 2.

**Exposure Guidelines/Other:** The Blaster Corporation takes no responsibility for determining what measures are required for personal protection in any specific application. This information should be used with discretion.
