

Same Day Repairs

Why wait hours or days to complete a repair? With Bondo® Wood Filler, you can complete professional looking repairs in less than 30 minutes. The secret to a fast, permanent repair is in the 2-part technology. By mixing the filler with the cream hardener, provided with the filler, you can sand the wood filler in 15 minutes and stain or paint it in 25 minutes.

Strength to Restore and Rebuild

Bondo® Wood Filler can handle any wood repair ranging from the smallest to the largest of projects. Whether filling in minor furniture damage or rebuilding a missing piece of wood, the solution is Bondo® Wood Filler. When the filler and hardener are mixed, a reaction occurs which allows the filler to chemically bond to the surface you are repairing. This technological advantage of a 2-part wood filler also allows the product to cure quickly and adhere permanently to the repaired surface. For more advanced repairs, Bondo® Wood Filler can be applied in layers to rebuild rotted or missing pieces of wood. Unlike slower drying water or solvent based wood fillers that cure by evaporation, Bondo® Wood Filler chemically cross links to cure for a faster, more durable repair. As a result, Bondo® Wood Filler is water resistant and will not shrink. Not only can you save money, but you can make professional, great looking repairs.
