RDMI1005A page 2 Section 3 -- HAZARDS IDENTIFICATION _____ ____ ROUTES OF EXPOSURE INHALATION of vapor or spray mist. EYE or SKIN contact with the product, vapor or spray mist. EFFECTS OF OVEREXPOSURE EYES: Irritation. SKIN: Prolonged or repeated exposure may cause irritation. INHALATION: Irritation of the upper respiratory system. May cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death. SIGNS AND SYMPTOMS OF OVEREXPOSURE Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists. Redness and itching or burning sensation may indicate eye or excessive skin exposure. MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE None generally recognized. CANCER INFORMATION For complete discussion of toxicology data refer to Section 11. Section 4 -- FIRST AID MEASURES _____ EYES: Flush eyes with large amounts of water for 15 minutes. Get medical attention. Wash affected area thoroughly with soap and water. SKIN: Remove contaminated clothing and launder before re-use. INHALATION: If affected, remove from exposure. Restore breathing. Keep warm and quiet. Do not induce vomiting. INGESTION: Get medical attention immediately. Section 5 -- FIRE FIGHTING MEASURES ------LEL UEL 0.9 9.5 FLASH POINT Propellant < 0 F EXTINGUISHING MEDIA Carbon Dioxide, Dry Chemical, Alcohol Foam UNUSUAL FIRE AND EXPLOSION HAZARDS Closed containers may explode (due to the build-up of pressure) when exposed to extreme heat. Application to hot surfaces requires special precautions. During emergency conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention. SPECIAL FIRE FIGHTING PROCEDURES Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

RDMI1005A	page 3
Section 6 ACCIDENTAL RELEASE MEASURES	
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED Remove all sources of ignition. Ventilate the area. Remove with inert absorbent.	
Section 7 HANDLING AND STORAGE	
<pre>STORAGE CATEGORY Not Available PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE Keep away from heat, sparks, and open flame. Vapors will acc readily and may ignite explosively. During use and until all vapors are gone: Keep area ventilat smoke - Extinguish all flames, pilot lights, and heaters - Turn electric tools and appliances, and any other sources of ignition Consult NFPA Code. Use approved Bonding and Grounding proced Contents under pressure. Do not puncture, incinerate, or exp temperature above 120F. Heat from sunlight, radiators, stoves, and other heat sources could cause container to burst. Do not to internally. Keep out of the reach of children.</pre>	ted - Do not off stoves, lures. bose to hot water, take
Section 8 EXPOSURE CONTROLS/PERSONAL PROTECTION	
PRECAUTIONS TO BE TAKEN IN USE Use only with adequate ventilation. Avoid contact with skin and eyes. Avoid breathing vapor and Wash hands after using. This coating may contain materials classified as nuisance par (listed "as Dust" in Section 2) which may be present at hazardou only during sanding or abrading of the dried film. If no specif are listed in Section 2, the applicable limits for nuisance dust TLV 10 mg/m3 (total dust), 3 mg/m3 (respirable fraction), OSHA F (total dust), 5 mg/m3 (respirable fraction). Removal of old paint by sanding, scraping or other means may dust or fumes that contain lead. Exposure to lead dust or fumes brain damage or other adverse health effects, especially in chil pregnant women. Controlling exposure to lead or other hazardous requires the use of proper protective equipment, such as a proper respirator (NIOSH approved) and proper containment and cleanup. information, call the National Lead Information Center at 1-800- (in US) or contact your local health authority. VENTILATION Local exhaust preferable. General exhaust acceptable if the materials in Section 2 is maintained below applicable exposure 1 Refer to OSHA Standards 1910.94, 1910.107, 1910.108. RESPIRATORY PROTECTION If personal exposure cannot be controlled below applicable li ventilation, wear a properly fitted organic vapor/particulate re approved by NIOSH/MSHA for protection against materials in Secti When sanding or abrading the dried film, wear a dust/mist res approved by NIOSH/MSHA for dust which may be generated from this underlying paint, or the abrasive.	cticulates as levels ic dusts is are ACGIH PEL 15 mg/m3 generate s may cause ldren or s substances erly fitted For more -424-LEAD exposure to limits. mits by espirator ion 2. spirator

Section 10 STABILITY AND REACTIVITY					
STABILITY Stable CONDITIONS TO AVOID None known. INCOMPATIBILITY None known. HAZARDOUS DECOMPOSITION PRODUCTS By fire: Carbon Dioxide, Carbon Monoxide HAZARDOUS POLYMERIZATION Will not occur ===================================					
CHRONIC HEALTH HAZARDS Prolonged and repeated exposure to Hexane may cause damage to nerve tissue of the arms and legs (peripheral neuropathy), resulting in muscular weakness and loss of sensation. This effect may be increased by the presence of Methyl Ethyl Ketone. Prolonged overexposure to solvent ingredients in Section 2 may cause adverse effects to the liver, urinary, cardiovascular and reproductive systems. Rats exposed to titanium dioxide dust at 250 mg./m3 developed lung cancer, however, such exposure levels are not attainable in the workplace. Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

ECOTOXICOLOGICAL INFORMATION No data available.							
Section 13 DISPOSAL CONSIDERATIONS							

WASTE DISPOSAL METHOD

Waste from this product may be hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Waste must be tested for ignitability to determine the applicable EPA

hazardous waste numbers.

Do not incinerate. Depressurize container. Dispose of in accordance with Federal, State/Provincial, and Local regulations regarding pollution.

CALIFORNIA PROPOSITION 65 WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. TSCA CERTIFICATION All chemicals in this product are listed, or are exempt from listing, on the TSCA Inventory.				
Section 16 OTHER INFORMATION				

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.
