

Non-Toxic • Odorless • Lasts for Months

These Fly Catchers will lure and catch flies, gnats, moths and many other flying insects. Use in any room to control flying insects without using an insecticide. Non-toxic, odorless, transparent (almost invisible), does not mark windows, sticks to screens and is easy to use.

Flying insects are attracted to windows & screens by light and heat. The clear Fly Catchers attach to your windows or screens and stop the bugs fast. Replace every few months or when full of flies.

DIRECTIONS FOR USE

1. Remove white strip from the back of the Fly Catcher. This will expose the line of adhesive that attaches the trap to the window. Place trap at the bottom or top of the window and press along this sticky strip to attach to the glass.
2. Hold one side of the trap and quickly pull off the cover sheet from the front of the Catcher. This exposes the baited insect trapping glue which faces into the room.
3. For larger windows use more than one Window Fly Trap.
Works best on windows exposed to the most sunshine.

EXTRA TIPS: If the Fly Catcher's glue pulls up when you try to remove the protective sheet, just place the catcher in your freezer for 3 minutes. This cools the glue and the release sheet will pull right off. If glue gets on your hands, remove easily with vegetable oil.

INSTRUCCIONES DE USO:

1. Retire la cinta blanca de la parte posterior del atrapamoscas. Esto expondrá la línea de adhesivo que pega la trampa a la ventana. Coloque la trampa en la parte inferior o superior de la ventana y presione a lo largo de la cinta pegajosa para adherirla al vidrio.
2. Sostenga un lado de la trampa y jale rápidamente la hoja de cubierta desde la parte frontal del atrapamoscas. Esto expone la goma atrapamoscas, la cual debe quedar hacia el interior de la habitación.
3. Para ventanas más grandes, utilice más de una trampa atrapamoscas para ventanas. Funciona mejor en las ventanas más expuestas al sol.
