IDENTITY (As Used on Label and List) Bonide Pruning Sealer and Tree Wound Dressing

U.S Department of Labor Occupational Safety and Health Administration (Non-Mandatory Form) Form Approved OMB No. 1218-0072

Date: June 6, 2000

Section I

Bonide Products, Inc. 2 Wurz Ave Yorkville, NY 13495

Section II - Hazardous Ingredients/Identity

Hazardous Components (Specific Chemical Identity: Common Na	me(s) OSHA PEL	ACGIH TLV	Other Limits	% (Optional)
Aliphatic Petroleum Solvent	100 ppm	100ppm		15-20
CAS #64742-88-7, #64742-47-8, #8052-41-3	ACGIH ST	EL: 200 PPM		
*Petroleum Asphalt	5 mg/m3	5 mg/m3		13-18
CAS #8052-42-4	(for fu	imes)		
NIOSH: 5mg/m3 (ceiling limit)				
Calcium Carbonate 5 m	g/m3 /5 mg/m3	10mg/m3 (nui	sance dust)	13-18
CAS # 1317-65-3 and/or CAS #471-34-1 (total	dust) (respirable	fraction)		
	15 mg/m3	(total dust)		
*Hydrous Aluminum Silicate	15mg/m3	10mg/m3		8-12
	(nuisanc	e dust)		
Methanol	200ppm (skii	n) 200 ppm		2-4

(800) 424-9300 (315) 736-8231

* This component poses a hazard only if a dust is formed, i.e. by sawing, sanding, drilling, etc.

Section III - Physical/Chemical Ingredients

COLOR: Black	APPEARANCE: Viscous Liquid			
ODOR: Petroleum Solvent	pH: Not Applicable			
BOILING POINT (initial): ND	VAPOR DENSITY (air=1): >1			
SOLUBILITY IN WATER: Negligible	VAPOR PRESSURE (mmHg @ 20°C): ND			
SPECIFIC GRAVITY: 1.11	PERCENT VOLATILE BY VOLUME: Not Determined			
EVAPORATION RATE (n-Butyl Acetate=1): Not Determined				

Section IV - Fire and Explosion Data

FLASHPOINT: >105°F EXPLOSIVE LIMITS: LEL: 0.6 UEL: 7.0

EXTINGUISHING MEDIA: Small Fires: Dry chemical, CO2, water spray or regular foam

Large Fires: Water spray, fog or regular foam. Move container from fire area if you can do it without risk. Apply cooling water to sides of containers that are exposed to flames until wll after fire is out. Stay away from ends of tanks. For massive fire in cargo area, use unmanned hose holder or monitor nozzles. If this is impossible, withdraw from area and let fire burn. Withdraw immediately in case of rising sound from venting safety device or any discoloration of tank due to fire.

SPECIAL FIREFIGHTING PROTECTION/EMERGENCY ACTION: Fire may produce irritating or poisonous gases. Positive pressure self-contained breathing apparatus (SCBA) and structural firefighters' protective clothing will provide limited protection. Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind; keep out of low areas. Isolate for ½ mile in all diections if tank, rail car or tank truck is involved in fire. If runoff from fire control occurs, notify the appropriate authorities.

UNUSUAL FIRE/EXPLOSION HAZARDS: Flammable/combustible material; may be ignited by heat, sparks or flames. Vapors may travel to a source of ignition and flash back. Container may explode in heat of fire. Vapor explosion hazard indoors, outdoors or in sewers. Runoff to sewer may create fire or explosion hazard.

PRODUCTS OF COMBUSTION: Carbon monoxide, carbon dioxide, oxides of sulfur miscellaneous hydrocarbons.

Section V - Reactivity Data

STABILITY: Stable HAZARDOUS POLYMERIZATION: Will not occur INCOMPATIBILITY: Strong acids, oxidizing agents HAZARDOUS DECOMPOSITION PRODUCTS: miscellaneous hydrocarbons.

Carbon monoxide, carbon dioxide, oxides of sulfur,

Section VI - Health Hazard Information

PRIMARY ROUTES OF ENTRY: Inhalation, skin absorption

ACUTE EFFECTS: Excessive inhalation may produce dizziness, nausea, headache and incoordination. May cause reversible eye and skin irritation. Prolonged skin exposure may cause dermatitis or oil acne. Breathing mists may cause dizziness or pulmonary irritation.

CHRONIC EFFECTS: Some asphalt solutions have produced skin cancer in laboratory animals. The activity of test materials varies widely, but the activity in general, is weak. Based on the skin painting data, IARC has concluded that there is sufficient evidence for carcinogenicity of asphalts, diluted, dissolved or liquefied in solvents, in laboratory animals. Workers, therefore, who practice poor personal hygiene and who are repeatedly exposed by direct skin contact to petroleum asphalts over many years, may potentially be at risk of developing skin cancer. Intermittent or occasional skin contact with petroleum asphalts is not expected to have serious health effects as long as good personal hygiene measures, such as those outlined in this Material Safety Data Sheet, are followed. In addition, asphalt vapors may container polycyclic aromatic hydrocarbons, some of which are known to be carcinogenic. Therefore, prolonged breathing of vapors should be avoided.

SPECIAL REMARKS: Some asphalts may container hydrogen sulfide (CAS #7783-05-4) ACGIH TLV= 10ppm. Hydrogen sulfide (HS) may accumulate in storage tanks and bulk transport compartments containing asphalts. Prolonged breathing of low levels of HS will produce eye/respiratory tract irritation; extremely high levels (1000ppm) can cause unconsciousness/death.

CARCINOGENICITY: Asphalt solutions are considered to be animal carcinogens by IARC.

Calcium Carbonate and Hydrous Aluminum Silicate may contain less than 0.1% of Silica Crystalline Quartz (CAS #14808-60-7). IARC Monographs on the evaluations of the Carcinogenic Risk of Chemicals to Humans (Volume 42, 1987) concludes that there is "limited evidence" of the carcinogenicity of crystalline silica to humans. IARC classification 2A.

PRE-EXISTING MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Exposure may aggravate preexisting respiratory or skin problems.

FIRST AID PROCEDURES:

INHALATION: Move victim to fresh air and call emergency medical care. If not breathing, give artificial respiration; if breathing is difficult, give oxygen.

EYES: In case of contact with material, immediately flush eyes with running water for at leat 15 minutes. Seek immediate medical attention.

SKIN: Wash skin with soap and water. Remove and isolate contaminated clothing and shoes at the site.

INGESTION: DO NOT INDUCE VOMITING. Consult a physician. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into the lungs.

Section VII - Precautions for Safe Handling/Use

HANDLING AND STORAGE PRECAUTIONS: Store in cool, well-ventilated area. Keep away from flames, sparks or hot surfaces. Never use a torch to cut or weld on or near container. Empty containers can contain explosive vapors.

OTHER PRECAUTIONS: Never wear contaminated clothing. Launder or dry clean before wearing. Discard oil soaked shoes. Wash thoroughly with soap and water (waterless hand cleaner may be helpful in removing residues) after use and before smoking or eating. Avoid excessive skin contact.

RESPIRATORY PROTECTION:NIOSH-approved respirator for organic vapor and mist to control exposure where ventilation is inadequate.

VENTILATION: General and local exhaust.

PROTECTIVE GLOVES: Impervious gloves (Viton, PVOH, etc.)

EYE PROTECTION: Safety glasses with sideshields or chemical goggles.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: If splashing is anticipated, wear rubber apron and boots or other protective equipment to minimize contact.

Section VIII - Environmental and Disposal Information

SPILL OR LEAK PROCEDURES: Shut off ignition sources; no flares, smoking or flames in hazard area. Stop leak if you can do it without risk.

SMALL SPILLS: Take up with sand or other noncombustible absorbent material and place into containers for later disposal.

LARGE SPILLS: Dike far ahead of liquid spill for later disposal.

WASTE DISPOSAL METHODS: Dispose of in accordance with state, local and federal regulations. Materials may become a hazardous waste through use. If permitted, incineration may be practiced. Consider recycling solvent.

Section IX - Regulatory Information

VOLATILE ORGANIC CONTENT:	(Calculated Values)				
VOC per gallon:		3	.8 lbs/gal
