

USE & CARE INSTRUCTIONS

EASY TO FILL

Wide top allows you to fill with ease.

You're holding a new type of bird feeder made by people who really love birds.

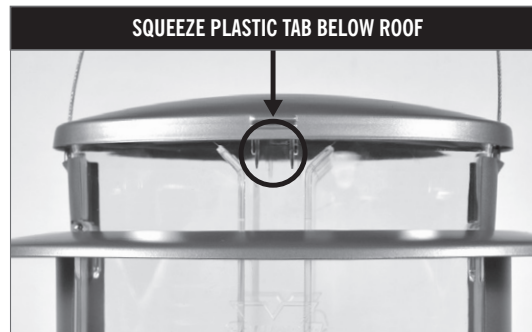

After talking with birders all around the country, we took what they know and combined it with what we know to make feeders that are better for you and better for the birds. All our feeders are easy to fill and our Stay Full Port® provides constant food at each perch. This feeder is designed to keep squirrels out so you can Feed Birds, Not Squirrels!

Created to bring more joy and birds into your life.

Filling the Feeder

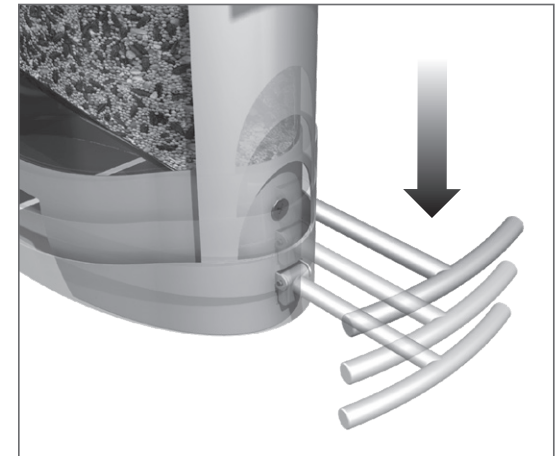

Step 1: Remove locking metal roof by squeezing the plastic tabs located under the rim and lifting.

Step 2: Pour seed into the wide top.

Step 3: Lock roof back onto feeder by placing it on feeder opening. Push down on one side until you hear a click as the roof locks onto the plastic tab. Repeat on the other side. Your feeder is now ready to hang. The locking metal roof keeps squirrels out of your feeder.

Cleaning the Feeder

Remove locking metal roof by squeezing the plastic tabs located under the rim and lifting. Hand wash with warm water and a mild antibacterial soap. Rinse thoroughly and let dry completely before refilling with seed.

Squirrel-Proof Ports

Sliding metal sleeve closes all ports simultaneously when a squirrel's weight is applied to any perch or the roof.
