We believe that the information contained herein is current as of the date of the material safety data sheet. Although it is possible that this mixture itself has not been tested as to what hazards may be present. OSHA section 1910. 1200 has been applied. This states that if one or more hazardous components are a level of 1.0% (or greater), then the mixture is presumed to have all the health hazards of the components. Since the use of the products is not within our control it is the user's obligation to determine the conditions of safe use of the product. Note: The formula contains a combination of ingredients other than the hazardous materials listed.
