PRODUCT AND COMPANY IDENTIFICATION

Product Name:TDL - The Dry LubeRevision Date:2/27/06MSDS Number:TDL - aerosolProduct Code:16-TDL

Manufacturer: The Blaster Chemical Companies, Inc. 8500 Sweet Valley Drive Valley View, Ohio 44125

> (216) 901-5800 (216) 901-5801 fax www.blasterproducts.com

2 COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients:

3

| Cas # | Chemical Name | Perc. |
|---------|-----------------------------|-------|
| 110543 | n-Hexane | >70% |
| 9002840 | Polytetrafluoroethylene | <10% |
| 124389 | Carbon dioxide (propellant) | <3% |

HAZARDS IDENTIFICATION

| Route of Entry: Target Organs: | Eyes, skin, inhalation, ingestion |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation: | Inhalation of spray mist likely to cause irritation to the respiratory tract. May cause headache, dizziness, nausea, vomiting or narcosis in confined or poorly ventilated areas. |
| Skin Contact: | Repeated or prolonged contact with skin may cause mild irritation and possibly dermatitis. |
| Eye Contact: | Likely to cause immediate or delayed irritaion. Irritation will show as redness and/or swelling of the eyes. |
| Ingestion: | Ingestion may cause irritation to the mouth, esophagus and stomach. May cause abdominal pain, vomiting, dizziness and headaches. |

May aggravate a pre-existing skin and respiratory disorders.

Physical Hazard: Aerosol containers are pressurized (even when empty!) Do not expose to temperatures above 120^o F. Do not puncture or burn can. Failure to observe these precautions may result in rapid and violent decompression of the container producing projectiles and atomization of the liquid contents.

Notice: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

| 4 | | FIRST AID MEASURES |
|---------------|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation: | | ove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Continuie initor. Get medical attention. |
| Skin Contact: | | ove contaminated clothing immediately! Wash skin with soap and water. If irritation develops, seek cal attention. |
| Eye Contact: | Flush treatm | eye(s) with water for 15 minutes. Get medical attention. If eye irritation presists, obtain medical nent. |
| Ingestion: | | scious, immediately give the person two large glasses of water. Do not induce vomiting. Get medical tion immediately. |

FIRE FIGHTING MEASURES

Flash point: -15°F ASTM D-56 (TCC)

| Flammable Limits: | |
|---------------------------|-------|
| Lower Explosion Limit: | 1.2% |
| Upper Explosion Limit: | 7.7% |
| Autoignition Temperature: | 437°F |

Extinguishing Media: Dry chemical, carbon dioxide or foam is recommended. Water may be ineffective for extinguishment, but can be useful in minimizing or dispersing vapors, protecting personnel and cooling containers. If containers are not properly cooled they can rupture in the heat of a fire. Avoid spreading burning liquid with water used for cooling purposes.

Unusual Fire & Expolsion Hazards: Level 3 Aerosols - Contents Under Pressure! This material is extremely flammable and can be ignitied by heat, sparks, flames, or other sources of ignition (e.g. static electricity, pilot lights, mechanical/electric equipment, and electronic equipment such as cell phones, computers, calculators which have not been certified as intrinsically safe.) Vapors may travel considerable distances to a source of ignition where the can ignite, flash back or explode. May create vapor/air explosion indoors, in confined spaces, outdoors or in sewers. Vapors are heavier than air and can accumulate in low areas.

6

ACCIDENTAL RELEASE MEASURES

Keep all sources of ignition and heat away from the spill or release area. Leaking aerosol cans should be put into suitable container until the internal pressure has dissipated. Use suitable absorbents to collect liquid product. Consult regulations for the disposal of the container, liquid and absorbents.

| 7 | HANDLING AND STORAGE |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Handling Precaution | s: Use in accordance with good industrial workplace practices. Avoid unnecessary contact. Wash thoroughly after handling. Use with good ventilation. |
| Storage Requirement | ts: Store in a dry place away from excessive heat. Store containers with lids on and properly labeled. |
| | Do not store at temperatures above 120 degrees F. |

| 8 EXPO | SURE CONTROLS/PERSONAL PROTECTION |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Engineering Controls: Protective Equipment: | Eye wash stations and emergency showers should be immediately available. Eyes and Face: Standard safety glasses with splash shields typically offer adequate protection. Where excessive splashing or spraying is possible, a face shield should be used. Do not wear contacts. |
| | Skin and clothing: Excessive contact should be avoided. Nitrile gloves, boots and aprons will provide adequate protection when contact cannot be avoided. Remove and wash any contaminated clothing immediately. Wash thoroughly after handling. |
| | Respiratory: Good general ventilation should be sufficient to control airborne levels. Maintain airborne concentrations below OSHA established exposure limits of ingredients in Section 2. Use NIOSH approved respirator if ventilation is not adequate enough to maintain levels below these limits. |
| Exposure Guidelines/Other: | The Blaster Chemical Companies takes no responsibility for determining what measures are required for personal protection in any specific application. This information should be used with discretion. |

| 10 STABILITY | Page 4 of 5 AND REACTIVITY | |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------|--|
| Stability: | This product is stable. | |
| Conditions to avoid: | Avoid excessive heat, sources of ingition and excessive water. | |
| Materials to avoid (incompatability | Avoid contact with strong oxidizing agents and strong reducing agents (strong acid or bases.) Avoid mixture with water. | |
| Hazardous Decomposition product | s: Combustion will product carbon monoxide, carbon dioxide and other oxides. | |
| Hazardous Polymerization: | Will not occur. | |

11

TOXICOLOGICAL INFORMATION

Toxicological information on this product as a mixture has not been determined. See Section 15 for reportable ingredients.

12 **ECOLOGICAL INFORMATION**

Ecological information on this product as a mixture has not been determined.

13 **DISPOSAL CONSIDERATIONS**

Used or unused product should be disposed of in accordance with local, state and federal regulations. Some special regulations may exist for the disposal of aerosol containers.

Empty containers may contain residual pressure and contents. They should be handled with the same precautions as the product.

14

TRANSPORT INFORMATION

Dept. of Transportation (DOT):

This product, as it leaves Blaster's facilities, meets the definitions set forth in CFR 49 part 173.150c as a "consumer commodity." Allowing for certain exceptions (173.156) for domestic surface (ground) shipments.

Proper shipping name: Consumer Commodity Hazard class: ORM-D
