

Issuing Date 27-Oct 2014

Revision Date 20-Oct-2014

Revision Number 1

# 1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

### **Product identifier**

Product SDS Name Steel Reinforced Epoxy Resin - Syringe - Part A

# J-B Weld FG SKU Part Numbers Covered

50165, 50165-F, 50176, 50176-F

### J-B Weld Product Names Covered

J-B Weld<sup>™</sup> Syringe, KwikWeld<sup>™</sup> Syringe

### J-B Weld Product Type

#### Epoxy

### Recommended use of the chemical and restrictions on use

Recommended UseGeneral Purpose AdhesiveUses advised againstNo information available

# Details of the supplier of the safety data sheet

Supplier NameJ-B WELD COMPANY,LLCSupplier Address1130 COMO STSULPHUR SPRINGS, TX 75482USA

# **Emergency Telephone Numbers** Transportation Emergencies: Chemtrec (24 hour transportation emergency response info): 800-424-9300 or 703-527-3887

Poison/Medical Emergencies: Poison Control Centers (24 hour emergency poison / medical response info): 800-222-1222

Supplier Email

info@jbweld.com

Supplier Phone Number 903-885-7696

# 2. HAZARDS IDENTIFICATION

OSHA/HCS statusThis material is considered hazardous by the OSHA Hazard Communication Standard<br/>(29 CFR 1910.1200).Classification of the<br/>substance or mixtureSKIN CORROSION/IRRITATION - Category 2GHS label elementsSKIN SENSITIZATION - Category 1B

Hazard pictograms Signal word Hazard statements

Precautionary statements

Warning! Causes skin and eye irritation. May cause an allergic skin reaction.

| Prevention                          | Wear protective gloves. Wear eye or face protection. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace.  |
|-------------------------------------|--|
| Response                            | IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing.<br>Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical<br>attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove<br>contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists:<br>Get medical attention. |
| Storage                             | Not applicable.  |
| Disposal                            | Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Hazards not otherwise<br>classified | None known.  |

# **3. COMPOSITION / INFORMATION ON INGREDIENTS**

Substance/mixture

Mixture

| Ingredient name   | % by weight | CAS number |
|---|-------------|------------|
| reaction product: bisphenol-A-(epichlorhydrin); epoxy resin | 60 - 100    | 25068-38-6 |
| carbon black respirable                                     | 0.1 - 1     | 1333-86-4  |

### Occupational exposure limits, if available, are listed in Section 8.

| 4. FIRST AID MEASURES                                    |   |  |  |  |  |
|--|---|--|--|--|--|
| Description of necessary first aid measures              |   |  |  |  |  |
| Inhalation   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not<br>breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial<br>respiration or oxygen by trained personnel. It may be dangerous to the person providing<br>aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects<br>persist or are severe. If unconscious, place in recovery position and get medical<br>attention immediately. Maintain an open airway. Loosen tight clothing such as a collar,<br>tie, belt or waistband.  |  |  |  |  |
| Skin contact   | Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |  |  |  |  |
| Eye contact  | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |  |  |  |  |
| Ingestion  | Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |  |  |  |  |
| Most important symptoms/e<br>Potential acute health effe |   |  |  |  |  |
| r otomiai acute nealth ener                              |   |  |  |  |  |

Inhalation

No known significant effects or critical hazards.

| Skin contact               | Causes skin irritation. May cause an allergic skin reaction                     |  |  |
|----------------------------|---|--|--|
| Eye contact                | Causes serious eye irritation.  |  |  |
| Ingestion                  | Irritating to mouth, throat and stomach.  |  |  |
| Over-exposure signs/sympto | oms   |  |  |
| Inhalation                 | No specific data.   |  |  |
| Skin contact               | Adverse symptoms may include the<br>following: irritation redness               |  |  |
| Eye contact                | Adverse symptoms may include the following: pain or irritation watering redness |  |  |
|                            | No specific data.   |  |  |

Ingestion Indication of immediate medical attention and special treatment needed, if necessary

**Notes to physician** Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

**Specific treatments** No specific treatment.

#### See toxicological information (Section 11)

#### **5. FIRE-FIGHTING MEASURES** Extinguishing media Use an extinguishing agent suitable for the surrounding fire. Suitable extinguishing media None known. **Unsuitable extinguishing** media Specific hazards arising No specific fire or explosion hazard. from the chemical National Fire Protection Association (U.S.A.) Flammability Health Instability/Reactivity **Special Hazardous thermal** Decomposition products may include the following materials: decomposition products carbon dioxide carbon monoxide halogenated compounds metal oxide/oxides **Special protective actions** Promptly isolate the scene by removing all persons from the vicinity of the incident if for fire-fighters there is a fire. No action shall be taken involving any personal risk or without suitable training. **Special protective equipment** Fire-fighters should wear appropriate protective equipment and self-contained breathing for fire-fighters apparatus (SCBA) with a full face-piece operated in positive pressure mode.

# 6. ACCIDENTAL RELEASE MEASURES

| •••  |   |
|--|---|
| Personal precautions, protective                                   | ve equipment and emergency procedures   |
| For non-emergency<br>personnel                                     | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Provide adequate ventilation.<br>Wear appropriate respirator when ventilation is inadequate. Put on appropriate<br>personal protective equipment.   |
| For emergency responders   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel".  |
| Environmental precautions<br>Methods and materials for cont        | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).<br>tainment and cleaning up   |
| Small spill  | Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.   |
| Large spill  | Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.   |
|  | 7. HANDLING AND STORAGE   |
| Conditions for safe storage,<br>including any<br>incompatibilities | Do not store above the following temperature: 35°C (95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |
| Precautions for safe handling                                      |   |
| Protective measures  | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.  |
| Advice on general<br>occupational hygiene                          | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

# 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

## **Control parameters**

# **Occupational exposure limits**

| Ingredient name                            | C  | CAS #  | Exposure limits   |  |
|--|--|--|---|--|
| carbon black respirable                    | 1  | 1333-86-4  | OSHA PEL 1989 (United States, 3/1989).<br>TWA: 3.5 mg/m <sup>3</sup> 8 hours.<br>ACGIH TLV (United States, 6/2013).<br>TWA: 3 mg/m <sup>3</sup> 8 hours. # **13. DISPOSAL CONSIDERATIONS**

**Disposal methods** 

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Occupational exposure limits, if available, are listed in Section 8.

Mixture

# 4. FIRST AID MEASURES

| <b>Description of necessary</b> |  |
|---------------------------------|--|
| first aid measures              | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not  |
| Inhalation                      | breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or<br>oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-<br>to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe.<br>If unconscious, place in recovery position and get medical attention immediately. Maintain an<br>open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of<br>inhalation of decomposition products in a fire, symptoms may be delayed. The exposed<br>person may need to be kept under medical surveillance for 48 hours.  |
| Skin contact                    | Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention if adverse health effects persist or are severe. If necessary, call a poison center or physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Eye contact                     | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids.<br>Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get<br>medical attention if irritation occurs.   |
| Ingestion                       | Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

Most important symptoms/effects, acute and delayed

| Potential acute health | effects  |
|------------------------|--|
| Inhalation             | Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure. |
| Skin contact           | Harmful in contact with skin.  |
| Eye contact            | No known significant effects or critical hazards.  |
| Ingestion              | Harmful if swallowed.  |

| Over-exposure signs/sy               | <u>/mptoms</u>   |  |
|--------------------------------------|--|--|
| Inhalation                           | No specific data.  |  |
| Skin contact                         | No specific data.  |  |
| Eye contact                          | No specific data.  |  |
| Ingestion<br>Indication of immediate | No specific data.<br>medical attention and special treatment needed, if necessary  |  |
| Notes to physician                   | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |  |
| Specific treatments                  | No specific treatment.   |  |

# See toxicological information (Section 11)

|  | 5. FIRE-FIGHTING MEASURES   |
|--|---|
| Extinguishing media  | Use an extinguishing agent suitable for the surrounding fire.   |
| Suitable extinguishing<br>media<br>Unsuitable extinguishing<br>media | None known.   |
| Specific hazards arising<br>from the chemical                        | No specific fire or explosion hazard.   |
| National Fire Protection Assoc                                       | iation (U.S.A.)   |
| Health 200   | Flammability<br>Instability/Reactivity<br>Special   |
| Hazardous thermal<br>decomposition products                          | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>sulfur oxides<br>metal<br>oxide/oxides                     |
| Special protective actions for fire-fighters                         | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable |
| Special protective equipment<br>for fire-fighters                    | training.<br>Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

# 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel<br>For emergency responders         | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Provide adequate ventilation.<br>Wear appropriate respirator when ventilation is inadequate. Put on appropriate<br>personal protective equipment.<br>If specialised clothing is required to deal with the spillage, take note of any information<br>in Section 8 on suitable and unsuitable materials. See also the information in "For<br>nonemergency personnel". |  |  |
|--|---|--|--|
| Environmental precautions<br>Methods and materials for cont        | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |  |  |
| Small spill  | Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA  |  |  |
| Large spill  | filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.<br>Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor.<br>Note: see Section 1 for emergency contact information and Section 13 for waste disposal.  |  |  |
| 7. HANDLING AND STORAGE  |   |  |  |
| Conditions for safe storage,<br>including any<br>incompatibilities | Do not store above the following temperature: 35°C (95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.   |  |  |
| Precautions for safe handling                                      |   |  |  |
| Protective measures<br>Advice on general<br>occupational hygiene   | Put on appropriate personal protective equipment (see Section 8). Do not ingest.<br>Avoid contact with eyes, skin and clothing. Keep in the original container or an<br>approved alternative made from a compatible material, kept tightly closed when not in<br>use. Empty containers retain product residue and can be hazardous. Do not reuse<br>container. Eating, drinking and smoking should be prohibited in areas where this  |  |  |

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

# Control parameters Occupational exposure limits

Ingredient name

CAS #

**Exposure limits** 

| titanium dioxide                                   | 13463-67-7  | ACGIH TLV (United States, 3/2012).<br>TWA: 10 mg/m <sup>3</sup> 8 hours.<br>OSHA PEL 1989 (United States, 3/1989).<br>TWA: 10 mg/m <sup>3</sup> 8 hours. Form: Total dust<br>OSHA PEL (United States, 6/2010).<br>TWA: 15 mg/m <sup>3</sup> 8 hours. Form: Total dust |
|--|---|---|
| Appropriate engineering<br>controls                | No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.   |   |
| Environmental exposure<br>controls                 | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |   |
| Individual protection measures<br>Hygiene measures | S Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.   |   |
| Respiratory protection                             | Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.   |   |
| Skin protection                                    |   |   |
| Hand protection                                    | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |   |
| Body protection                                    | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |   |
| Other skin protection                              | selected based of   | vear and any additional skin protection measures should be<br>n the task being performed and the risks involved and should be<br>ecialist before handling this product.   |
| Eye/face protection                                | Safety eyewear complying with an approved standard should be used when a risk<br>assessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br>gases or dusts. If contact is possible, the following protection should be worn, unless<br>the assessment indicates a higher degree of protection: safety glasses with side-<br>shields.  |   |

# 9. PHYSICAL AND CHEMICAL PROPERTIES

| Physical States                               | Solid.  |
|---|---|
| Color   | White.  |
| Odor  | Pungent. Sulfurous. {Strong]  |
| Odor threshold                                | Not available.  |
| рН  | Not available.  |
| Melting point                                 | Not available.  |
| Boiling point                                 | Not available.  |
| Flash point                                   | Closed cup: >93.3°C (>199.9°F)[Setaflash.] [Product does not sustain combustion.]                             |
| Evaporation rate                              | Not available.  |
| Flammability (solid, gas)                     | Flammable in the presence of the following materials or conditions: open flames, sparks and static discharge. |
| Lower and upper explosive (flammable) limited | Not available.  |
| Vapor pressure                                | Not available   |
| Vapor density                                 | Not available.  |
| Relative density                              | 1.2   |
| Solubility                                    | Not available.  |
| Solubility in water                           | Not available.  |
| Auto-ignition temperatures                    | Not available.  |
| Decomposition temperature                     | >200°C(>392°F)  |
| Viscosity                                     | Not available   |
| VOC (% content)                               | <3%   |
|   |   |

|                                    | 10. STABILITY AND REACTIVITY   |
|------------------------------------|--|
| Reactivity                         | No specific test data related to reactivity available for this product or its ingredients.           |
| Chemical stability                 | The product is stable.   |
| Possibility of hazardous reactions | Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | No specific data.  |
| Incompatible materials             | No specific data.  |
| Hazardous decomposition products   | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

|-------------------------|--------------------------------------|------------------------------|----------|
| titanium dioxide        | Acute LC50 1000000 µg/l Marine water | Fish - Fundulus heteroclitus | 96 hours |

# Persistence and degradability No specific data.

# **Bioaccumulative potential**

| Product/ingredient name                   | LogPow | BCF | Potential |
|---|--------|-----|-----------|
| 2,4,6-tris<br>(dimethylaminomethyl)phenol | 0.219  | -   | low       |
| titanium dioxide                          | -      | 352 | low       |

Soil/water partition coefficient (Koc)

Not available.

Other adverse effects

No known significant effects or critical hazards.

# **13. DISPOSAL CONSIDERATIONS**

**Disposal methods** 

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Not available.

### **RCRA classification**
