# **SECTION 2. HAZARDS IDENTIFICATION**

## **GHS Classification**

Not a hazardous substance or mixture.

## **GHS Label element**

| Hazard pictograms        | : No Hazard Symbol required  |
|--------------------------|--|
| Signal word              | : No signal word   |
| Hazard statements        | <ul> <li>PHYSICAL HAZARDS:<br/>Not classified as a physical hazard under GHS criteria.<br/>HEALTH HAZARDS:<br/>Not classified as a health hazard under GHS criteria.<br/>ENVIRONMENTAL HAZARDS:<br/>Not classified as an environmental hazard under GHS criteria.</li> </ul> |
| Precautionary statements | <ul> <li>Prevention:<br/>No precautionary phrases.</li> <li>Response:<br/>No precautionary phrases.</li> <li>Storage:<br/>No precautionary phrases.</li> <li>Disposal:<br/>No precautionary phrases.</li> </ul>  |

#### Other hazards which do not result in classification

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Version 1.5

Revision Date: 08/27/2015

Print Date: 08/28/2015

Used oil may contain harmful impurities. Not classified as flammable but will burn.

The classification of this material is based on OSHA HCS 2012 criteria.

Under normal conditions of use or in a foreseeable emergency, this product does not meet the definition of a hazardous chemical when evaluated according to the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

## SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

| Chemical nature | <ul> <li>Synthetic base oil and additives.<br/>Highly refined mineral oil.<br/>The highly refined mineral oil contains &lt;3% (w/w) DMSO-<br/>extract, according to IP346.<br/>The highly refined mineral oil is only present as additive dilu-<br/>ent.</li> </ul> |
|-----------------|---|
|                 | * contains one or more of the following CAS-numbers: 64742-<br>53-6, 64742-54-7, 64742-55-8, 64742-56-9, 64742-65-0,<br>68037-01-4, 72623-86-0, 72623-87-1, 8042-47-5, 848301-69-<br>9.   |

## Hazardous components

| Chemical Name  | Synonyms  | CAS-No.      | Concentration (%) |
|--|---|--------------|-------------------|
| Polyolefin amide alkenea-<br>mine                                  |   | 84605-20-9   | 1 - 5             |
| Alkylated phenol ester   |   | 125643-61-0  | 1 - 3             |
| Zinc dialkyl dithiophos-<br>phate                                  | Phosphorodithioic<br>acid, O,O-di-C1-14-<br>alkyl esters, zinc<br>salts | 68649-42-3   | 1 - 2.4           |
| Interchangeable low vis-<br>cosity base oil (<20,5 cSt<br>@40°C) * |   | Not Assigned | 0 - 90            |

#### **SECTION 4. FIRST-AID MEASURES**

| General advice          | : Not expected to be a health hazard when used under normal conditions.   |
|-------------------------|---|
| If inhaled              | : No treatment necessary under normal conditions of use.<br>If symptoms persist, obtain medical advice.   |
| In case of skin contact | <ul> <li>Remove contaminated clothing. Flush exposed area with wa-<br/>ter and follow by washing with soap if available.</li> <li>If persistent irritation occurs, obtain medical attention.</li> </ul> |
| In case of eye contact  | : Flush eye with copious quantities of water.<br>If persistent irritation occurs, obtain medical attention.   |
| If swallowed            | : In general no treatment is necessary unless large quantities  |
| / 15                    | 800001003701  |

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

| Version 1.5   | Revision Date: 08/27/2015  | Print Date: 08/28/2015     |
|---|--|----------------------------|
|   | are swallowed, however, get me   | dical advice.              |
| Most important symptoms and effects, both acute and delayed | : Oil acne/folliculitis signs and syn<br>of black pustules and spots on the<br>Ingestion may result in nausea, | ne skin of exposed areas.  |
| Protection of first-aiders                                  | : When administering first aid, ens<br>appropriate personal protective<br>incident, injury and surroundings    | equipment according to the |
| Immediate medical attention, special treatment              | : Treat symptomatically.   |                            |

#### **SECTION 5. FIRE-FIGHTING MEASURES**

| Suitable extinguishing media                  | : | Foam, water spray or fog. Dry chemical powder, carbon dio-<br>xide, sand or earth may be used for small fires only.   |
|---|---|---|
| Unsuitable extinguishing media                | : | Do not use water in a jet.  |
| Specific hazards during fire-<br>fighting     | : | Hazardous combustion products may include:<br>A complex mixture of airborne solid and liquid particulates and<br>gases (smoke).<br>Carbon monoxide may be evolved if incomplete combustion<br>occurs.<br>Unidentified organic and inorganic compounds.  |
| Specific extinguishing me-<br>thods           | : | Use extinguishing measures that are appropriate to local cir-<br>cumstances and the surrounding environment.  |
| Special protective equipment for firefighters | : | Proper protective equipment including chemical resistant<br>gloves are to be worn; chemical resistant suit is indicated if<br>large contact with spilled product is expected. Self-Contained<br>Breathing Apparatus must be worn when approaching a fire in<br>a confined space. Select fire fighter's clothing approved to<br>relevant Standards (e.g. Europe: EN469). |

### SECTION 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protec-<br>tive equipment and emer-<br>gency procedures | : | Avoid contact with skin and eyes.   |
|---|---|---|
| Environmental precautions   | : | Use appropriate containment to avoid environmental contami-<br>nation. Prevent from spreading or entering drains, ditches or<br>rivers by using sand, earth, or other appropriate barriers. |
|   |   | Local authorities should be advised if significant spillages cannot be contained.   |
| Methods and materials for containment and cleaning up                         | : | Slippery when spilt. Avoid accidents, clean up immediately.<br>Prevent from spreading by making a barrier with sand, earth<br>or other containment material.                                |
| 15  |   | 800001003701  |

### **Biological occupational exposure limits**

#### No biological limit allocated. Monitoring Methods

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods http://www.cdc.gov/niosh/

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods http://www.osha.gov/

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances http://www.hse.gov.uk/

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA), Germany http://www.dguv.de/inhalt/index.jsp

L'Institut National de Recherche et de Securité, (INRS), France http://www.inrs.fr/accueil

### Engineering measures

: The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product. Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Version 1.5

Revision Date: 08/27/2015

| Personal protective equipmer |   |
|------------------------------|---|
| Respiratory protection       | : No respiratory protection is ordinarily required under normal conditions of use.<br>In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material.<br>If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation.<br>Check with respiratory protective equipment suppliers.<br>Where air-filtering respirators are suitable, select an appropriate combination of mask and filter.<br>Select a filter suitable for the combination of organic gases and vapours [Type A/Type P boiling point >65°C (149°F)].  |
| Hand protection              |   |
| Remarks                      | : Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break-through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same, but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. |
| Eye protection               | : If material is handled such that it could be splashed into eyes, protective eyewear is recommended.   |
| Skin and body protection     | <ul> <li>Skin protection is not ordinarily required beyond standard<br/>work clothes.</li> <li>It is good practice to wear chemical resistant gloves.</li> </ul>  |
| Protective measures          | : Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.   |
| Environmental exposure cont  | rols  |
| General advice               | : Take appropriate measures to fulfill the requirements of rele-  |

| Version 1.5               | Revision Date: 08/27/2015  | Print Date: 08/28/2015     |
|---------------------------|--|----------------------------|
| Acute inhalation toxicity | : Remarks: Not considered to be a normal conditions of use.      | an inhalation hazard under |
| Acute dermal toxicity     | : LD50 (Rabbit): > 5,000 mg/kg<br>Remarks: Expected to be of low | toxicity:                  |

### Skin corrosion/irritation

#### Product:

Remarks: Expected to be slightly irritating., Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

#### Serious eye damage/eye irritation

#### Product:

Remarks: Expected to be slightly irritating.

### Respiratory or skin sensitisation

## Product:

Remarks: Not expected to be a skin sensitiser.

### Germ cell mutagenicity

### Product:

: Remarks: Not considered a mutagenic hazard.

## Carcinogenicity

### Product:

Remarks: Not expected to be carcinogenic.

| IARC  | No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC. |
|-------|---|
| ACGIH | No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.            |
| OSHA  | No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.             |
| NTP   | No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.                 |

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200

Version 1.5

Revision Date: 08/27/2015

Print Date: 08/28/2015

## **Reproductive toxicity**

### Product:

Remarks: Not expected to impair fertility., Not expected to be a developmental toxicant.

#### STOT - single exposure

### Product:

Remarks: Not expected to be a hazard.

### STOT - repeated exposure

### Product:

Remarks: Not expected to be a hazard.

## Aspiration toxicity

## Product:

Not considered an aspiration hazard.

### **Further information**

### Product:

Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal., ALL used oil should be handled with caution and skin contact avoided as far as possible.

Remarks: Continuous contact with used engine oils has caused skin cancer in animal tests.

Remarks: Slightly irritating to respiratory system.

### **SECTION 12. ECOLOGICAL INFORMATION**

| Basis for assessment                               | : | Ecotoxicological data have not been determined specifically<br>for this product.<br>Information given is based on a knowledge of the components<br>and the ecotoxicology of similar products.<br>Unless indicated otherwise, the data presented is representa-<br>tive of the product as a whole, rather than for individual com-<br>ponent(s).(LL/EL/IL50 expressed as the nominal amount of<br>product required to prepare aqueous test extract). |

### SECTION 13. DISPOSAL CONSIDERATIONS

| Disposal methods         |   |
|--------------------------|---|
| Waste from residues :    | Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Waste, spills or used product is dangerous waste.  |
|                          | Disposal should be in accordance with applicable regional,<br>national, and local laws and regulations.<br>Local regulations may be more stringent than regional or na-<br>tional requirements and must be complied with.   |
| Contaminated packaging : | Dispose in accordance with prevailing regulations, preferably<br>to a recognized collector or contractor. The competence of<br>the collector or contractor should be established beforehand.<br>Disposal should be in accordance with applicable regional,<br>national, and local laws and regulations. |

#### **SECTION 14. TRANSPORT INFORMATION**

#### **National Regulations**

#### US Department of Transportation Classification (49 CFR Parts 171-180)

Not regulated as a dangerous good

#### **International Regulation**

#### **IATA-DGR**

Not regulated as a dangerous good

#### IMDG-Code

Not regulated as a dangerous good

#### Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

| Pollution category<br>Ship type<br>Product name<br>Special precautions | : | Not applicable<br>Not applicable<br>Not applicable<br>Not applicable |
|--|---|--|
| Special precautions for user   |   |  |

#### Remarks

: Special Precautions: Refer to Chapter 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

## Additional Information : MARPOL Annex 1 rules apply for bulk shipments by sea.

## **SECTION 15. REGULATORY INFORMATION**

- **OSHA Hazards**
- : No OSHA Hazards

Version 1.5

Revision Date: 08/27/2015

Print Date: 08/28/2015

## EPCRA - Emergency Planning and Community Right-to-Know Act

#### **CERCLA Reportable Quantity**

| Components      | CAS-No.  | Component RQ | Calculated product RQ |
|-----------------|----------|--------------|-----------------------|
|                 |          | (lbs)        | (lbs)                 |
| Ethylene Glycol | 107-21-1 | 5000         | *                     |

\*: Calculated RQ exceeds reasonably attainable upper limit.

## CERCLA Reportable Quantity

Calculated RQ exceeds reasonably attainable upper limit., Shell classifies this material as an "oil" under the CERCLA Petroleum Exclusion, therefore releases to the environment are not reportable under CERCLA., The components with RQs are given for information.

#### SARA 304 Extremely Hazardous Substances Reportable Quantity

This material does not contain any components with a section 304 EHS RQ.

| SARA 311/312 Hazards | : No SARA Hazards   |
|----------------------|---|
| SARA 302             | : No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.   |
| SARA 313             | : This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313. |

## **Clean Water Act**

This product does not contain any Hazardous Chemicals listed under the U.S. CleanWater Act, Section 311, Table 117.3.

| Pennsylvania Right To Know            |  |                   |
|---------------------------------------|--|-------------------|
