

# 1 Identification

## **GHS Product Identifier**

Trade name:Max Pro Isopropyl Alcohol Precision CleanerProduct code:3467

# Recommended use of the chemical and restriction on use

Electronics cleaner

### Supplier's details

Max Pro P.O. Box 9962 Ft Lauderdale FL USA 33310

Tel.: 954-972-3338

### **Emergency phone number**

CHEMTREC 24 Hour Emergency Response USA & Canada 800-424-9300

# 2 Hazard(s) identification

## Classification of the substance or mixture

| Physical Hazards                                   |                             |
|--|-----------------------------|
| Flammable aerosols                                 | Category 1                  |
| Gases under pressure                               | Liquefied gas               |
| Health Hazards                                     |                             |
| Serious eye damage/eye irritation                  | Category 2                  |
|  |                             |
| Specific target organ toxicity,<br>single exposure | Category 3 narcotic effects |
| single exposule                                    | Category 5 harcotic effects |
| Aspiration hazard                                  | Category 1                  |
|  |                             |
| Environmental hazards                              |                             |
| Not classified.                                    |                             |
| OSHA defined hazards                               |                             |
| Not classified.                                    |                             |
|  |                             |

## **GHS** label elements

Danger

Contains gas under pressure; may explode if heated

May be fatal if swallowed and enters airways

Causes serious eye irritation

May cause drowsiness or dizziness

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Do not spray on an open flame or other ignition source.

Do not pierce or burn, even after use.

Avoid breathing dust/fume/gas/mist/vapours/spray.

Wash hands thoroughly after handling.

Wear protective gloves/protective clothing/eye protection/face protection.

IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.

Do NOT induce vomiting.

IF INHALED: Remove person to fresh air and keep comfortable for breathing.

IF INHALED: Call a POISON CENTER or doctor/physician if you feel unwell.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

IF eye irritation persists: Get medical advice/attention.

Store in a well-ventilated place.

Store locked up.

Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

Dispose of contents/container to in accordance with local/regional/national regulations.

#### Other hazards which do not result in classification

#### PREVENTION

Do not apply while equipment is energized. Vapors will accumulate readily and may ignite. Use only with adequate ventilation; maintain ventilation during use and until all vapors are gone. Open doors and windows or use other means to ensure a fresh air supply during use and while product is drying. If you experience any symptoms listed on this label, increase ventilation or leave the area.

#### <u>HNOC</u>

Static accumulating flammable liquid can become electrostatically charged even in bonded and grounded equipment. Sparks may ignite liquid and vapor. May cause flash fire or explosion.

### **3** Composition/information on ingredients

| Description        | CAS Number | %       | Note  |
|--------------------|------------|---------|---|
| 2-Propanol         | 67-63-0    | 70 - 80 | Isopropyl Alcohol purity no less than 99.5% |
| Propane            | 74-98-6    | 12 - 18 |   |
| Isobutane          | 75-28-5    | 3 - 4.5 |   |
| n-Butane           | 106-97-8   | 5 - 7.5 |   |
| First-aid massures |            |         |   |

#### First-aid measures

### Description of necessary first-aid measures

First-aid measures after inhalation:

Remove victim to fresh air and keep at rest in a position

|  | comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.  |
|--|--|
| First-aid measures after skin contact: | Rinse skin with water/shower. Get medical attention if irritation develops and persists.   |
| First-aid measures after eye contact:  | Immediately flush eyes with plenty of water for at least 15<br>minutes. Remove contact lenses, if present and easy to do.<br>Continue rinsing. Get medical attention if irritation develops<br>and persists. |
| First-aid measures after ingestion:    | Call a physician or poison control center immediately. Rinse mouth.<br>Do not induce vomiting. If vomiting occurs, keep head low so that<br>stomach content doesn't get into the lungs.                      |
| First-aid measures general:            | Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.   |

### Most important symptoms/effects, acute and delayed

May cause drowsiness and dizziness. Headache. Nausea, vomiting. Irritation of nose and throat. Aspiration may cause pulmonary edema and pneumonitis. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

## Indication of immediate medical attention and special treatment needed, if necessary

Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

### 5 Fire-fighting measures

### Suitable extinguishing media

Alcohol resistant foam. Water fog. Carbon dioxide (CO2). Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.

Unsuitable extinguishing media: None known.

### Specific hazards arising from the chemical

Contents under pressure. Pressurized container may explode when exposed to heat or flame. This product is a poor conductor of electricity and can become electrostatically charged. If sufficient charge is accumulated, ignition of flammable mixtures can occur. Static electricity accumulation may be significantly increased by the presence of small quantities of water or other contaminants. Material will float and may ignite on surface of water. During fire, gases hazardous to health may be formed.

### Special protective actions for fire-fighters

Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

In case of fire: Stop leak if safe to do so. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapor pressure build up.

Extremely flammable aerosol. Contents under pressure. Pressurized container may explode when exposed to heat or flame.

### 6 Accidental release measures

### Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Remove all possible sources of ignition in the surrounding area. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist or vapor. Avoid breathing gas. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Use appropriate containment to avoid environmental contamination. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

### **Environmental precautions**

Avoid discharge into drains, water courses or onto the ground. Use appropriate containment to avoid environmental contamination.

### Methods and materials for containment and cleaning up

Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Stop the flow of material, if this is without risk. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS. Prevent entry into waterways, sewer, basements or confined areas.

### 7 Handling and storage

### Precautions for safe handling

Minimize fire risks from flammable and combustible materials (including combustible dust and static accumulating liquids) or dangerous reactions with incompatible materials. Handling operations that can promote accumulation of static charges include but are not limited to: mixing, filtering, pumping at high flow rates, splash filling, creating mists or sprays, tank and container filling, tank cleaning, sampling, gauging, switch loading, vacuum truck operations. Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. Use caution around energized equipment. The metal container will conduct electricity if it contacts a live source. This may result in injury to the user from electrical shock and/or flash fire. Avoid breathing mist or vapor. Avoid breathing gas. Avoid contact with eyes. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices. For product usage instructions, please see the product label.

### Conditions for safe storage, including any incompatibilities

Level 2 Aerosol.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Avoid spark promoters. These alone may be insufficient to remove static electricity. Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).

### 8 Exposure controls/personal protection

### Control parameters

#### **Occupation exposure limits**

### US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

| Components        | Туре | Value                 |
|-------------------|------|-----------------------|
| Isopropyl Alcohol | PEL  | 980 mg/m <sup>3</sup> |
| (CAS 67-63-0)     |      |                       |
|                   |      | 440 ppm               |

| US. ACGIH Threshold L   | imit Values       |                           |                        |               |
|-------------------------|-------------------|---------------------------|------------------------|---------------|
| Components              |                   | Туре                      | Value                  |               |
| Isopropyl Alcohol       |                   | STEL                      | 400 ppm                |               |
| (CAS 67-63-0)           |                   |                           |                        |               |
|                         |                   | TWA                       | 200 ppm                |               |
| US. NIOSH: Pocket Gui   | de to Chemical Ha | azards                    |                        |               |

|                         |                   |                           |                        |               |

\* - For sampling details, please see the source document.

# Appropriate engineering controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

### Individual protection measures

| Eye/face protection:                | Wear safety glasses with side shields (or goggles).  |
|-------------------------------------|--|
| Skin protection<br>Hand protection: | Wear protective gloves such as: Neoprene. Polyvinyl alcohol (PVA).   |
| Other:                              | Wear suitable protective clothing.   |
| <u>Respiratory protection:</u>      | If engineering controls are not feasible or if exposure exceeds the<br>applicable exposure limits, use a NIOSH-approved cartridge respirator<br>with an organic vapor cartridge. Use a self-contained breathing<br>apparatus in confined spaces and for emergencies. Air monitoring is<br>needed to determine actual employee exposure levels. |
| <u>Thermal hazards</u>              | Wear appropriate thermal protective clothing, when necessary.  |
| General hygiene considerations      | When using do not smoke. Always observe good personal hygiene<br>measures, such as washing after handling the material and before<br>eating, drinking, and/or smoking. Routinely wash work clothing and<br>protective equipment to remove contaminants.  |

## **10** Stability and reactivity

### Reactivity

The product is stable and non-reactive under normal conditions of use, storage and transport.

### **Chemical stability**

Material is stable under normal conditions.

### Possibility of hazardous reactions

No dangerous reaction known under conditions of normal use.

### **Conditions to avoid**

Heat, flames and sparks. Contact with incompatible materials.

### **Incompatible materials**

Acids. Aldehydes. Alkalis. Amines. Chlorinated hydrocarbons. Halogens. Strong oxidizing agents. Isocyanates. Chlorine.

# Hazardous decomposition products

Carbon oxides.

# 11 Toxicological information

# **Toxicological (health) effects**

Acute toxicity

May be fatal if swallowed and enters airways. Narcotic effects.

### Information on the likely routes of exposure

| Ingestion    | Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia. |
|--------------|--|
| Inhalation   | May cause drowsiness and dizziness. Headache. Nausea, vomiting.<br>Prolonged inhalation may be harmful.                |
| Skin contact | Prolonged skin contact may cause temporary irritation.   |
| Eye contact  | Causes serious eye irritation.   |

# Symptoms related to the physical, chemical and toxicological characteristics

May cause drowsiness and dizziness. Headache. Nausea, vomiting. Irritation of nose and throat. Aspiration may cause pulmonary edema and pneumonitis. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

## Numerical measures of toxicity (such as acute toxicity estimates)

| Product<br>Isopropyl Alcohol Precision Cleaner | Species | Test Results  |
|--|---------|---|
| <b>Acute</b><br>Dermal                         |         |   |
| LD50   | Rabbit  | 18719.959 mg/kg estimated   |
| Inhalation<br>LC50                             | Rat     | 21548.1543 ppm, 4 hours estimated 52.9277 mg/l, 4 hours estimated |
| Oral   |         |   |
| LD50   | Rat     | 6329.77 mg/kg estimated   |
|  | Rat     | 6329.77 mg/kg estimated   |

\* Estimates for product may be based on additional component data not shown.

| Interactive effects               |  |
|-----------------------------------|--|
| Skin corrosion/irritation         | Prolonged skin contact may cause temporary irritation.   |
| Serious eye damage/eye irritation | Causes serious eye irritation.   |
| Respiratory sensitization         | Not available.   |
| Skin sensitization                | This product is not expected to cause skin sensitization.  |
| Germ cell mutagenicity            | No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic. |
| Carcinogenicity                   | This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA.                                  |
| Reproductive toxicity             | This product is not expected to cause reproductive or developmental effects.                                     |
| Specific target organ toxicity    |  |
| single exposure                   | May cause drowsiness and dizziness.  |

#### Specific target organ toxicity

| repeated exposure | Not classified.   |
|-------------------|---|
| Aspiration hazard | May be fatal if swallowed and enters airways. If aspirated into<br>lungs during swallowing or vomiting, may cause chemical<br>pneumonia, pulmonary injury or death. |
| Chronic effects   | Prolonged inhalation may be harmful.  |

## 12 Ecological information

#### Toxicity

Ecotoxicity

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

| Product                             |      | Species          | Test Results                        |

### Persistence and degradability

Readily biodegradable formula.

#### **Bioaccumulative potential**

No data available.

#### Partition coefficient n-octanol / water (log Kow) 1.1-Difluoroethane 0.75

|                   | 0.70 |
|-------------------|------|
| Isopropyl alcohol | 0.05 |
|                   |      |

## Mobility in soil

No data available.

### Other adverse effects

No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

|                    | Disposal methods  |   |  |
|--------------------|---|---|--|
|                    | Disposal of waste from<br>residues / unused products                    | If discarded, this product is considered a RCRA ignitable waste,<br>D001. Collect and reclaim or dispose in sealed containers at<br>licensed waste disposal site. Contents under pressure. Do not<br>puncture, incinerate or crush. Dispose in accordance with all<br>applicable regulations. |  |
|                    | Hazardous waste code  | D001: Waste Flammable material with a flash point <140 F  |  |
|                    | Contaminated packaging  | Empty containers should be taken to an approved waste<br>handling site for recycling or disposal. Since emptied<br>containers may retain product residue, follow label warnings<br>even after container is emptied.   |  |
