Lithium-ion batteries comply with all applicable shipping regulations as prescribed by industry and legal standards which include UN Recommendations on the Transport of Dangerous Goods; the 62nd Edition of the IATA Dangerous Goods Regulations and US DOT requirements. Cells and Batteries have been tested to section 38.3 of the UN Recommendations on the Transport of Dangerous Goods Manual of Tests and Criteria. All of the batteries listed in this Safety Data Sheet are greater than 100 Whrs; therefore, most modes of transportation require the batteries to be shipped as fully regulated Class 9 Hazardous Material. In the United States, 49 CFR 173.185(c)(1)(iv) of the Hazardous Materials Regulations provides an exception from fully regulated Class 9 shipping when shipping batteries up to 300 Whrs by motor vehicle or rail car. All air shipments of lithium ion batteries without equipment require the state of charge of the battery to be no greater than 30% of the rated design capacity and are banned from shipment on passenger aircraft (Cargo Aircraft Only).
