Most important symptoms and effects, both acute and delayed

- Symptoms/effects after ingestion* : May be harmful if swallowed. May cause gastrointestinal irritation, nausea, vomiting and diarrhea.
- Symptoms/effects after inhalation* : May cause irritation to the respiratory tract.
- Symptoms/effects after skin contact* : May cause skin irritation. Symptoms may include redness, drying, defatting and cracking of the skin.
- Symptoms/effects after eye contact* : Causes serious eye irritation. Symptoms may include discomfort or pain, excess blinking and tear production, with marked redness and swelling of the conjunctiva.

Immediate medical attention and special treatment, if necessary

- Other medical advice or treatment* : Symptoms may be delayed. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

SECTION 5. FIREFIGHTING MEASURES

- Suitable extinguishing media* : Water spray. Dry chemical powder, alcohol-resistant foam, carbon dioxide (CO₂).
