| Section 2. Hazard                            | s identification   |
| OSHA/HCS status                              | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).              |
| Classification of the                        | : FLAMMABLE LIQUIDS - Category 3   |

 substance or mixture
 SKIN SENSITIZATION - Category 1

 TOXIC TO REPRODUCTION - Category 2
 SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3

 SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3
 SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1

 ASPIRATION HAZARD - Category 1
 Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 54.9% (oral), 54.9% (dermal), 54.9% (inhalation)

# Section 2. Hazards identification

| Hazard statements                   | : Flammable liquid and vapor.<br>May be fatal if swallowed and enters airways.<br>May cause an allergic skin reaction.  |
|-------------------------------------|---|
|                                     | May cause respiratory irritation.<br>May cause drowsiness or dizziness.   |
|                                     | Suspected of damaging fertility or the unborn child.  |
|                                     | Causes damage to organs through prolonged or repeated exposure.   |
| Precautionary statements            |   |
| General                             | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.   |
| Prevention                          | : Obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Wear protective gloves, protective clothing and eye or face<br>protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition<br>sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment.<br>Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or<br>in a well-ventilated area. Do not breathe vapor. Do not eat, drink or smoke when using<br>this product. Wash thoroughly after handling. Contaminated work clothing must not be<br>allowed out of the workplace. |
| Response                            | : IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove<br>person to fresh air and keep comfortable for breathing. Call a POISON CENTER or<br>doctor if you feel unwell. IF SWALLOWED: Immediately call a POISON CENTER or<br>doctor. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all<br>contaminated clothing. Rinse skin with water. Wash contaminated clothing before<br>reuse. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get<br>medical advice or attention.  |
| Storage                             | : Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.  |
| Disposal                            | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Supplemental label<br>elements      | DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE. Contains solvents which<br>can cause permanent brain and nervous system damage. Intentional misuse by<br>deliberately concentrating and inhaling the contents can be harmful or fatal. WARNING:<br>This product contains chemicals known to the State of California to cause cancer and<br>birth defects or other reproductive harm.   |
|                                     | This product contains a Significant New Use Rule (SNUR) Chemical. Do not allow this product to enter drains, sewers, wastewater treatment systems, groundwater, streams, lakes or ponds. See Environmental Data Sheet (EDS) for additional details.   |
|                                     | Please refer to the SDS for additional information. Keep out of reach of children. Do not transfer contents to other containers for storage.  |
| Hazards not otherwise<br>classified | : DANGER: Rags, steel wool, other waste soaked with this product, and sanding residue may spontaneously catch fire if improperly discarded. Immediately place rags, steel wool, other waste soaked with this product, and sanding residue in a sealed, water-filled, metal container. Dispose of in accordance with local fire regulations.   |

Date of previous issue

# Section 3. Composition/information on ingredients

| Ingredient name                      | % by weight | CAS number |
|--------------------------------------|-------------|------------|
| Light Aliphatic Hydrocarbon          | ≥25 - ≤50   | 64742-47-8 |
| Heavy Naphthenic Petroleum Oil       | ≥10 - ≤25   | 64742-52-5 |
| Med. Aliphatic Hydrocarbon Solvent   | ≤5          | 64742-88-7 |
| Mineral Spirits (Odorless)           | ≤5          | 64742-48-9 |
| Xylene, mixed isomers                | <1          | 1330-20-7  |
| Methyl Ethyl Ketoxime                | ≤0.3        | 96-29-7    |
| Zirconium 2-Ethylhexanoate           | ≤0.3        | 22464-99-9 |
| Hydrotreated Heavy Petroleum Naphtha | ≤0.3        | 64742-48-9 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| <b>Description of</b> | <sup>i</sup> necessary | first aid | measures |
|-----------------------|------------------------|-----------|----------|
|                       |                        |           |          |

| Eye contact  | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br>minutes. Get medical attention following exposure or if feeling unwell.   |
|--------------|---|
| Inhalation   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.   |

Most important symptoms/effects, acute and delayed

| Potential acute health effects |   |
|--------------------------------|---|
| Eye contact                    | No known significant effects or critical hazards.   |
| Inhalation                     | Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation. |
| Skin contact                   | May cause an allergic skin reaction.  |
| Ingestion                      | Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways.                        |

| Date of issue/Date | of revision                      | : 2/8/2022 | Date of previous issue | : 10/22/2021 | Version : 7      | 3/18 |
|--------------------|----------------------------------|------------|------------------------|--------------|------------------|------|
| 70109              | MINWAX® WOOD FIN<br>Barn Red 287 | lish®      |                        |              | SHW-85-NA-GHS-US |      |

### Section 4. First aid measures

| Over-exposure signs/    | <u>symptoms</u>   |
|-------------------------|---|
| Eye contact             | : No specific data.   |
| Inhalation              | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |
| Skin contact            | : Adverse symptoms may include the following:<br>irritation<br>redness<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |
| Ingestion               | : Adverse symptoms may include the following:<br>nausea or vomiting<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations   |
| Indication of immediate | e medical attention and special treatment needed, if necessary  |
| Notes to physician      | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |

- Specific treatments : No specific treatment.
- Protection of first-aiders
   No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                        |  |
|--|--|
| Suitable extinguishing media               | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media             | : Do not use water jet.  |
| Specific hazards arising from the chemical | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. |

| Date of issue/Date | of revision      | : 2/8/2022 | Date of previous issue |
|--------------------|------------------|------------|------------------------|
| 70109              | MINWAX® WOOD FIN | IISH®      |                        |
|                    | Barn Red 287     |            |                        |

# Section 5. Fire-fighting measures

| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>sulfur oxides<br>metal oxide/oxides   |
|--|--|
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment.   |
|--------------------------------|---|
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : This product contains a Significant New Use Rule (SNUR) Chemical. Do not allow this product to enter drains, sewers, wastewater treatment systems, groundwater, streams, lakes or ponds. See Environmental Data Sheet (EDS) for additional details.   |
|                                | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | ntainment and cleaning up   |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact |

| Date of issue/Date | of revision       | : 2/8/2022 |
|--------------------|-------------------|------------|
| 70109              | MINWAX® WOOD FINI | SH®        |

information and Section 13 for waste disposal.

# Section 7. Handling and storage

| Precautions for safe handling                                      |  |
|--|--|
| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not swallow. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in a segregated and approved area.<br>Store in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not store in<br>unlabeled containers. Use appropriate containment to avoid environmental<br>contamination. See Section 10 for incompatible materials before handling or use.   |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

Occupational exposure limits (OSHA United States)

| Ingredient name                           | CAS #                  | Exposure limits  |

#### Occupational exposure limits (Mexico)

|                             | CAS #      | Exposure limits   |
|-----------------------------|------------|---|
| Light Aliphatic Hydrocarbon | 64742-47-8 | ACGIH TLV (United States, 1/2021).<br>Absorbed through skin.<br>TWA: 200 mg/m <sup>3</sup> , (as total hydrocarbon<br>vapor) 8 hours. |
| Mineral Spirits (Odorless)  | 64742-48-9 | ACGIH TLV (United States, 1/2021).<br>Absorbed through skin.<br>TWA: 200 mg/m <sup>3</sup> , (as total hydrocarbon<br>vapor) 8 hours. |
| Zirconium 2-Ethylhexanoate  | 22464-99-9 | NOM-010-STPS-2014 (Mexico, 4/2016).<br>TWA: 5 mg/m³, (as Zr) 8 hours.<br>STEL: 10 mg/m³, (as Zr) 15 minutes.                          |

| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
|----------------------------------|--|
| Environmental exposure controls  | This product contains a Significant New Use Rule (SNUR) Chemical. Do not allow<br>this product to enter drains, sewers, wastewater treatment systems, groundwater,<br>streams, lakes or ponds. See Environmental Data Sheet (EDS) for additional<br>details.   |
|                                  | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measur     | es   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.  |
| Skin protection                  |  |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |

| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. |
|------------------------|---|
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be selected<br/>based on the task being performed and the risks involved and should be approved by a<br/>specialist before handling this product.</li> </ul>   |
| Respiratory protection | <ul> <li>Based on the hazard and potential for exposure, select a respirator that meets the<br/>appropriate standard or certification. Respirators must be used according to a<br/>respiratory protection program to ensure proper fitting, training, and other important<br/>aspects of use.</li> </ul>  |

# Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| <u>Appearance</u>                                       |   |  |
|---|---|--|
| Physical state  | : | Liquid.  |
| Color   | : | Not available.   |
| Odor  | : | Not available.   |
| Odor threshold  | : | Not available.   |
| рН  | : | Not applicable.  |
| Melting point/freezing point                            | : | Not available.   |
| Boiling point, initial boiling point, and boiling range | : | 148°C (298.4°F)  |
| Flash point   | : | Closed cup: 41°C (105.8°F) [Pensky-Martens Closed Cup] |
| Evaporation rate  | : | 0.13 (butyl acetate = 1)                               |
| Flammability  | : | Not available.   |
| Lower and upper explosion<br>limit/flammability limit   | : | Lower: 1%<br>Upper: 7%                                 |
| Vapor pressure  | : | 0.17 kPa (1.27 mm Hg)                                  |
| Relative vapor density                                  | : | 5 [Air = 1]  |
| Relative density  | : | 0.88   |
| Solubility  | : | Not available.   |
| Partition coefficient: n-<br>octanol/water              | : | Not applicable.  |
| Auto-ignition temperature                               | : | Not available.   |
| Decomposition temperature                               | : | Not available.   |
| Viscosity   | : | Kinematic (40°C (104°F)): <20.5 mm²/s (<20.5 cSt)      |
| Molecular weight  | : | Not applicable.  |
| Aerosol product   |   |  |
| Heat of combustion                                      | : | 27.691 kJ/g  |
|   |   |  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.   |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidizing materials  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.   |

## Section 11. Toxicological information

#### Information on toxicological effects

**Acute toxicity** 

| Product/ingredient name                 | Result                | Species | Dose                   | Exposure |
|---|-----------------------|---------|------------------------|----------|
| Heavy Naphthenic Petroleum<br>Oil       | LD50 Oral             | Rat     | >5000 mg/kg            | -        |
| Xylene, mixed isomers                   | LC50 Inhalation Gas.  | Rat     | 6700 ppm               | 4 hours  |
|   | LD50 Oral             | Rat     | 4300 mg/kg             | -        |

Other adverse effects : No known significant effects or critical hazards.

# Section 13. Disposal considerations

| Disposal methods               | <ul> <li>This product contains a Significant New Use Rule (SNUR) Chemical. Do not allow this product to enter drains, sewers, wastewater treatment systems, groundwater, streams, lakes or ponds. See Environmental Data Sheet (EDS) for additional details.</li> <li>The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere</li> </ul> |
|--------------------------------|---|

# Section 14. Transport information

| Special precautions for us                    | er : | Multi-modal shipping descriptions are provided for informational purposes and do not<br>consider container sizes. The presence of a shipping description for a particular<br>mode of transport (sea, air, etc.), does not indicate that the product is packaged<br>suitably for that mode of transport. All packaging must be reviewed for suitability<br>prior to shipment, and compliance with the applicable regulations is the sole<br>responsibility of the person offering the product for transport. People loading and<br>unloading dangerous goods must be trained on all of the risks deriving from the<br>substances and on all actions in case of emergency situations. |

# Section 16. Other information

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

#### Notice to reader

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by the manufacturer, including but not limited to the incorporation of products not specified by the manufacturer, or the use or addition of products in proportions not specified by the manufacturer. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use of the product are not under the control of the manufacturer; the customer/buyer/user is responsible to determine the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be responsible for SDSs obtained from any other source.
