## Section 3 Hazard Identification

**Emergency Overview:** This material is a solvent-based primer-sealer used to coat wood and other surfaces before painting. This material is a white flowable liquid with a flash point of 106° F.**Primary Potential Routes of Exposure:**

Inhalation  
Skin Contact  
Eye Contact

**Potential Acute Health Effects:****Eye:** May cause eye irritation.**Skin:** May cause irritation or dermatitis.**Ingestion:** Although not considered a significant route of exposure, ingestion may cause gastrointestinal irritation if ingested.**Inhalation:** Inhalation of vapors may cause respiratory tract irritation.

---

## Section 4 First Aid Measures

---

**Eye contact:** Flush eyes with water for 15 minutes. Get medical attention.

**Skin contact:** Wash with soap and water. If irritation persists, get medical attention.

**Ingestion:** If swallowed, do not induce vomiting. Call a physician or poison control center immediately.

**Inhalation:** If exposed to excessive levels of vapor, remove person to fresh air. Seek medical attention if cough or other symptoms develop.

---

## Section 5 Fire Fighting Measures

---

**Flash Point** [method]: 106° F (41° C) [Pensky-Martin Closed Cup]

**Flammable Limits in Air:** Lower (LEL): 1.2 (estimated based on the petroleum solvent).  
Upper (UEL): 9.6 (estimated based on the petroleum solvent).

**Extinguishing Media:** Water, All purpose dry chemical (ABC), CO<sub>2</sub>, or foam.

**Protection of Firefighters:** As in any fire, wear self-contained breathing apparatus in pressure demand mode and full protective gear.

---

## Section 6 Accidental Release Measures

---

**Clean Up Methods:** Eliminate all ignition sources. Keep unnecessary people away. Dike and contain spill with inert material (sand, earth, etc.). Transfer liquid to containers for recovery or disposal, or absorb with absorbent materials and place into containers for disposal. Keep spill out of sewer and open bodies of water. Floors may be slippery; care should be exercised to avoid falls during clean up operations.

(See also Section 8 for information on Exposure Controls and Personal Protective Equipment)

---

## Section 7 Handling and Storage

---

**Handling:** Avoid contact with eyes, skin, and clothing.

**Storage:** Store in a cool dry place away from excessive heat or open flame. Do not store near oxidizers.

---

## Section 8 Exposure Controls / Personal Protection

---

**Engineering Controls:** Use in well-ventilated areas. If necessary, use mechanical local exhaust ventilation or general room dilution ventilation to reduce vapor concentrations.

### **Personal Protective Equipment (PPE):**

**Eye Protection:** Prevent eye contact. Wear chemical splash goggles or similar eye protection if the potential exists for eye contact.

**Skin Protection:** Avoid unnecessary skin contact. It is recommended that rubber gloves be worn to prevent skin contact. Depending on conditions of use additional protective equipment may be necessary such as face-shield, apron or coveralls.

**Respiratory Protection:** None required for normally expected use conditions. If exposure limits are exceeded or if irritation is experienced, appropriate NIOSH approved respiratory protection with organic vapor cartridges should be worn.

**General Hygiene Practices:** Wash after handling material. Prevent Eye contact. Avoid prolonged skin and inhalation contact. Wash thoroughly before handling food, cosmetics, or before smoking.
