

INGREDIENT	WHAT IS IT?	WHAT DOES IT DO?
Water	deionized/demineralized water that has passed through filters to remove minerals	holds all ingredients together in solution
Decyl Glucoside	mild sugar- derived surfactant (surface active agent)	helps keep other ingredients blended while cleaning
Sodium Methyl 2-Sulfolaurate	readily biodegradable surfactant with viscosity modifying characteristics from coconut	provides foaming and cleaning power
Polysorbate 20	Emulsifier that make oils compatible with water	ensures even dispersion and stability of fragrance
Sodium Citrate	non-EDTA metal ion chelator from soy	softens water to boost cleaning performance
Fragrance	mixture of natural, high-quality essential oils and safe synthetic fragrance ingredients	smells great and provides an aromatherapeutic experience
Ocimum Basilicum (Basil) Oil	natural essential oil	provides fragrance
Carum Petroselinum (Parsley) Seed Oil	natural essential oil	provides fragrance
Piper Nigrum (Black Pepper) Seed Oil	natural essential oil	provides fragrance
Betula Alba (Birch) Bark Extract	natural plant extract from birch bark	cuts grease naturally to aid removal of soils
Glycerin (Household Cleaners)	natural corn-derived solublizer for extracts	provides shelf life stability for extracts
Citric Acid	natural fruit acid	modifies the pH of the formula for optimum cleaning and stability
Tetrasodium Glutamate Diacetate	non-EDTA chelating agent	softens water to boost cleaning performance
Sodium Sulfate	mineral salt	softens water to boost cleaning performance
Sodium Hydroxide	alkaline chemical compound	adjusts pH and stabilizes chelant
PEG-5 Cocoate	plant based emulsifier that makes oils compatible with water	ensures even dispersion and stability of fragrance
Methylisothiazolinone	non-formaldehyde preservative	safe and effective product preservative, < 1% of total volume to ensure shelf life safety
Benzisothiazolinone	non-formaldehyde, preservative	safe and effective product preservative, < 1% of total volume to ensure shelf life safety
