

INGREDIENT	WHAT IS IT?	WHAT DOES IT DO?
Sodium Sulfate	mineral salt	softens water to boost cleaning performance
Sodium Carbonate	natural mineral commonly referred to as washing soda	softens water and boosts surfactants for optimum cleaning
Sodium Citrate	non-EDTA metal ion chelator from soy	softens water to boost cleaning performance
Sodium Carbonate Peroxide	natural mineral commonly referred to as oxygen bleach	boosts cleaning power stain removal
Sodium Silicate	natural mineral	disperses grease and food deposits into small, suspended particles that easily rinse away
Water	deionized/demineralized water that has passed through filters to remove minerals	holds all ingredients together in solution
Sodium Polyacrylate	acrylic polymer	disperses food particles and helps to prevent their redeposition on surfaces
Hydrated Silica	natural mineral flow agent	prevents clumping of product
Lavandula Angustifolia (Lavender) Oil	natural essential oil	provides fragrance
Citrus Aurantium Dulcis (Orange) Peel Oil	natural essential oil	provides fragrance and cleaning efficacy
Fragrance	mixture of natural, high-quality essential oils and safe synthetic fragrance ingredients	smells great and provides an aromatherapeutic experience
Subtilisin (Protease)	enzyme from biofermentation reaction	removes protein stains and helps the detergent ingredients clean even better
Amylase	enzyme from biofermentation reaction	removes starch stains and helps surfactant ingredients clean even better
Linear Alcohol Ethoxylate	plant-derived nonionic surfactant (surface active agent) from coconut	cleans without foaming
