Use to clean and prepare old or new concrete block, brick, poured concrete, stucco, stone & tile prior to painting.

- Etches & cleans masonry walls
- Removes salt-like deposits
- Safer than Muriatic Acid

Description:

This product properly prepares concrete, masonry, brick, stone, stucco, and tile walls prior to painting by cleaning and etching the surface. It removes and neutralizes salt-like, powdery deposits (efflorescence), mortar stains and oil residue from forms. Just add water and stir. Do not use to clean horizontal surfaces, such as concrete driveways, before applying clear sealers since it may cause staining.

Application Guidelines:

Wear rubber gloves, goggles and protective clothing when using this product.

Surface Preparation:

First, remove dirt, dust, grease and oil from surface by washing with household detergent, using wire/stiff brush. Rinse thoroughly with clean water. Allow surface to dry.

Mixing:

Using clean container, first fill with warm clean water, then add Concrete Cleaner powder to water and stir gently. To etch concrete prior to painting walls: Add 12 oz to 1/2 gallon of warm water. To remove efflorescence/clean mortar: Add 12 oz to 1 gallon of warm water.

Application:

Scrub into surface with stiff bristle brush or wire brush. Leave on surface for 20-30 minutes. Thoroughly flush surface with clean water and allow to dry before painting. Keep product off of plants and shrubs.

Coverage:

12 oz will cover approximately 300 sq ft when mixed with 1 gallon water; 150 sq ft with 1/2 gallon water.

Cleanup:

Unused solution should be diluted with more water and disposed of immediately, in accordance with local, state and federal requirements. Wash gloves, hands, tools, and mixing container with soap and warm water.

Store in a Dry Place with Safety Cap Secured

Coverage: 12 oz will cover approximately 300 sq ft when mixed with 1 gallon water; 150 sq ft with 1/2 gallon water.

Size	Stock No.	Pack
12 oz.	09712	12

CAUTION:

KEEP OUT OF REACH OF CHILDREN.

Toxic! Irritant!

Contains Sulfamic Acid. May cause burns. Avoid contact with eyes, skin, clothing. In case of eye or skin contact, flush with water for 15 minutes. Get medical attention for eye contact. DO NOT TAKE INTERNALLY. If swallowed, drink 1-2 glasses of water. Call doctor or poison center immediately. Cautions are for both dry powder and solutions. Kills shrubs and plants.
