In response to your request for a Material Safety Data Sheet, in case one should be required, for SUPERthrive —

This is to certify that, after study of applicable regulations of the agency administering the Occupational Health and Safety requirements, I have not found any requirement for SUPERthrive to have a Material Safety Data Sheet, since none of the product hazard definitions found by us seem to include SUPERthrive for that purpose.

Therefore, no MSDS exists or is required for SUPERthrive.

Sincerely,

John A.A. Thomson, Ph.D., D.A.
